	Green	Lights solid green when powered on.
	Red	<ul style="list-style-type: none"> • Lights solid red when system failure has occurred. • Flashes red when VCI is upgrading.

GETTING STARTED

IMPORTANT: Before operating or maintaining this unit, please read these instructions carefully, paying extra attention to the safety warnings and precautions. Use this unit correctly and with care. Failure to do so may cause damage and/or personal injury and will void the product warranty.

WARNING: The MaxiFlash VCI is compatible with Autel main cable V2.0 and USB cable V2 only.

1

Connect the main cable V2.0 to the Vehicle Data Connector on the VCI unit, and tighten the thumb screws.

2

Connect the cable's 16-pin adapter to the vehicle's DLC, which is generally located under the vehicle dash.

3

Power up the tablet. Ensure the tablet has a charged battery or is connected to the supplied DC power supply.

4

Connect the tablet with the VCI via Bluetooth or USB cable. Use only the USB cable connection when programming.

5

When the VCI device is properly connected to the vehicle and the tablet, the VCI status button on the bottom tool bar of the screen shows a green badge, indicating the platform is ready to start vehicle diagnosis.
